### Avision AVScan Scanning & Imaging Solution

AVScan is an intelligent scanning and electronic filing solution. AVScan possesses distinct features that convert and index scanned information into electronic documents for easy storage and fast retrieval.

What bothers you most when you scan document?  
Distorted images?

Blurred image because of pencial text?

Often times, document imaging is the very first step of Document Management. However, poor quality images can cause serious problems to later indexing or storing processes. It may increase scanning labour costs due to manual correction and rescanning, and lowers the OCR accuracy when you want to search them from the DMS.

# Avision AV8350 A3 Document Scanner

Now you can hand over all your worries to AVScan. AVScan ensures that all documents are checked and polished at the time they are scanned so that the image quality are guaranteed before they are ready to use for other purposes.

## ScanSoft PaperPort - The Professional Choice to Organize and Share Your Documents

PaperPort is the easiest way to turn piles of paper and photos into organized files that you can quickly find, use and share. Stop wasting time searching for paper documents. End the frustration of organizing, editing and sharing your digital photographs. PaperPort makes it simple to connect your scanner and computer together to work with PDF and JPEG images just like working with paper documents right on your desktop. It is the perfect solution for your home or small office. Save time and money with the security of knowing that important documents and photos will never be lost.

## Kofax VRS – The Leader of Information Capture Software

VRS makes scanning as easy and efficient as possible, enhances the quality of scanned images, and dramatically reduces the cost of capturing information from paper documents

and forms. The useful features of VRS include scanning batches that consist of multiple document, sending alerts for paper jams and equipment conflicts, performing auto deskew without character degradation, auto brightness settings that are optimal for your document type, contrast enhancement for faint content, and suppressing any background or noise to yield smaller image file sizes.
